EDUCATION

Course	College / University	Year	CGPA / %
B.Tech (CSDS)	Netaji Subhas University of Technology	2023-27	7
CBSE (Class XII)	GD Goenka Public School, East Delhi	2023	86.2
CBSE (Class X)	GD Goenka Public School, East Delhi	2021	88.2

INTERNSHIP

- **Backend Engineer** | [Inhouse](#) | **Remote** May 2025 - July 2025
 - Monitored production backend environment for bugs and resolved high-severity issues immediately to maintain system stability and uptime/
 - Built automated script to convert markdown contracts into Google Docs format, streamlining document creation workflow and returning document IDs.
 - Integrated OCR support for PDF processing in chatbot system as fallback when standard PDF/DOC readers failed to extract content.
 - Developed new API functionalities and wrote unit tests for all implemented features.
- **Data Engineer** | [Jupiter](#) | **Remote** May 2024 - July 2024
 - Developed automated ETL scripts using cron jobs and GCP Cloud Scheduler, eliminating hours of daily manual data processing work.
 - Built Slack notification system for real-time business metrics including customer acquisitions and churn rates for stakeholder monitoring.
 - Created interactive dashboards on Explo and Google Looker Studio for customer-facing analytics and internal company reporting.
 - Leveraged BigQuery, Cloud Run, Cloud Build for scalable infrastructure, implemented CI/CD pipeline.

PROJECT

- **WhatsApp ChatBot** - 1000 Daily Average Users
 - Developed WhatsApp chatbot to automate attendance extraction from NSUT college portal for students, achieving *500 peak concurrent users* and eliminating manual portal navigation.
 - Engineered low-latency system with *OCR-powered CAPTCHA bypass* and automated web scraping to ensure uninterrupted real-time attendance data retrieval.
 - Implemented solution using *Meta WhatsApp Business API with webhooks* for message handling, Python backend, and Azure Container Instances for auto-scaling deployment.
- **Automated Crypto Trading Algorithms**
 - Built trading strategies including *Triangular Arbitrage, Mean Reversion, and Skewed Spread Setup* for crypto markets using Python.
 - Engineered a modular backtesting framework and real-time signal generation pipeline integrated with crypto exchange APIs.
 - Faced challenges in live deployment due to limitations in low-latency infrastructure, providing key learnings on the importance of system-level optimizations for financial trading.

ACADEMIC ACHIEVEMENTS

- JEE Advanced Rank: **10730** (General Category)
- JEE Mains Rank: **13334** (General Category)

TECHNICAL SKILLS

- **Languages:** Python(Expert), C++(Beginner), Javascript(Beginner)
- **Databases:** PostgreSQL, BigQuery, Redis, MongoDB, CockroachDB
- **Tools & Cloud:** Git, Docker, Azure, GCP, CI/CD, Flyway
